

2019 ENERGY ACTION MONTH

Energy Resilience Enables Army Readiness

U.S. Army photo by Sgt. Shawn Morris

**Learn how you can contribute to mission readiness
through energy conservation:**

2019 ENERGY ACTION MONTH

**Energy conservation
starts with you.**

- *Use natural light when possible and turn off the lights in vacant rooms.*
- *Power down computer monitors, peripherals and tasklighting at the end of each duty day.*
- *Unplug electronics that are not in use for extended periods of time.*
- *When purchasing electronics or appliances, choose ENERGY STAR® models.*
- *Use the "energy saver" mode on office copiers and printers.*
- *Close doors and windows to conditioned spaces.*
- *Ensure vents are unobstructed.*
- *Check doors and windows for drafts; report any drafts to your Facility Manager.*
- *Learn the Army Regulations that govern energy use in Federal facilities and adhere to them.*
- *If you notice energy waste or opportunities for energy conservation, discuss them with your Facility Manager or Building Energy Monitor.*
- *Implement conservation habits and measures at home and in your community.*
