

# ENERGY ACTION MONTH

Saving Energy Saves Money

Use a power strip for electronic equipment (not just computers) and turn it off when not in use – average savings is \$100 and up to 12 percent of annual electric bill.

Adjust your thermostat 7 to 10 degrees for eight hours a day – average savings is \$83 and up to 10 percent annually on cooling and heating bills.

By replacing your home's five most frequently used light fixtures or bulbs with models that have earned the ENERGY STAR, you can save \$75 each year.

# SAVING ENERGY SAVES MONEY

By replacing your home's five most frequently used light fixtures or bulbs with models that have earned the ENERGY STAR, you can save **\$75** each year.

Use a ceiling fan in the clockwise direction in the winter and counterclockwise in the summer. It only costs **\$2** a month to use ceiling and other fans to circulate air.

Turn off your computer monitor at the end of each day. It costs approximately 21 cents per day, or about **\$75** per year when computer monitors are left on all day.

Look for the Energy Star label, the government's symbol of energy efficiency, on a wide range of consumer products to **save up to 30%** on related electricity bills.

Seal window and door frames and other areas in homes and offices to **save up to 20%** on heating and cooling bills, while also increasing home comfort.
